INTRODUCTION

MUROTOKEN (later referred to as MURO) was written as a result of long investigations and tests of Whitepaper.

Due to innovative situations in crypto and blockchain, the MURO Developer Team reserves the right to make changes and updates to the entire MURO Project and Whitepaper. The necessary changes made as whitepaper currently published will be added to the next pages with update headings.

In this way, all MURO users will be given the chance to be informed of the initial conditions and developments made at any time.

WHAT IS MURO TOKEN ?

The MUROTOKEN project was created with a solution focus based on the ongoing problems of the cryptocurrency market and its development is planned in this direction.

Murotoken project is a unified project consisting of different platforms. It is built on 6 platforms in total. Therefore, it would be wrong to evaluate this project only on 1 platform. All of them constitute the MURO TOKEN project in a structure that supports each other in this context.

In general terms, the financial instruments that aim to spread to the base user base audience in a structure where everyone can easily trade, where you can only evaluate investment opportunities in cryptocurrency and blockchain technology, the gaming, entertainment applications and every user in our digital life, which constitutes a very large part of daily life,

it is a project that has gathered sub-platforms that serve in many areas such as social assistance projects that it is automatically involved in.

MURO Token is designed for the ecosystem of the MUROTOKEN project to make transactions between platforms easier and faster, to increase functionality and to be measurable.

With the coding in the MURO Token algorithm, it decentralizes some of the commission amounts issued to its investor evenly, burns some of them to reduce the amount in circulation, and sends some to the MURO Charity wallet to use for food, education and health expenses of children in need of help, such as nature street animals all over the world.

2. What is MURO TOKEN?

TECHNICAL INFORMATION

3. Technical Information

3.1 General Information

Token Name	MUROTOKEN
Symbol	MURO
Decimal	18
Blockchain	Binance Smart Chain (BEP20)
Contact Address	0x6b14a0F0798aC4cec85357B2B1ace59f726712BC
Maximum Total Supply	21.000.000.000
Printed Token	21.000.000.000
Locked Quantity	15.800.000.000
Mining	NO
Mining Life	NO
Smart Contract	YES

After long research, the MURO Developer Team has integrated a unique Auto Eco System software into the MURO Smart Contract that requires no human intervention. Thanks to this software, muro's popularity, awareness, availability and, most importantly, its bringingability are planned to remain constantly up-to-date. Let's take a look at how this ecosystem works and its purpose.

Muro Smart Contract cuts 8% of each transfer that occurs. (TAX Fee). The distribution scheme of this 8% taxation is also envisaged and planned as follows.

1% Fuel Tax: Although the same rule actually applies all over the world, if we lower the issue to crypto, as every user interested in this market knows, an asset with little supply will be worth more.

1% MURO cut per transfer

The token is automatically sent to the Fuel Wallet with 0x00dead address, which no one in the world has access to. With this 1% cut, the number of MURO in circulation is reduced with each transfer and a continuous and automatic burning system is established.

3. Technical Information

3.2. MURO Auto Eco System (Taxation)

1% HOLDERS Tax: One problem we saw when we examined other cryptocurrencies in the market was that users bought this cryptocurrency in very cheap quantities and put it back on sale in order to make high gains even in a small price rise. As a result of our surveys and surveys among cryptocurrency investors, we found that 68% would not pay much attention to the price in a scenario where the number of Coins they hold is constantly rising automatically.

With the automatic software added to the MURO contract, every transfer that takes place in the world (3.3. Except for Excluded Wallets), a 1% issued will be automatically distributed to the people who keep MURO in their wallet. Muro users can only use MURO in their wallets they will be rewarded for holding and will be able to increase the number of coins they hold without doing anything, which will give them an extra source of profit.

The Earned Holders Bonus is distributed according to the Algorithm specified below.

$$\text{HOLDERS Bonus} = \frac{\text{Quantity Deducted from Transfer}}{\text{Amount In Circulation (excluding excluded wallet magnets)}} \times \text{Amount Held in Wallet}$$

Amount In Circulation (excluding excluded wallet magnets)

You can review 3.3 Excluded Wallets to take a closer look at excluded wallets.

3. Technical Information

3.2. MURO Auto Eco System (Taxation)

1% MURO CHARITY: The 1% Coin Number, which is again deducted completely automatically from transfers, will be sent to the wallet defined for MURO Charity to create the sustainable source of finance of the project.
All the details of the MURO Charity Project are explained in the 13th MURO CHARitY section.

3. Technical Information

3.3. Excluded Wallets

Some wallet addresses set by the MURO Team are exempt from the above mentioned deductions and earnings. The reasons for this exemption are as follows;

Wallets defined in tokenomics such as R&D, Developer Team, Marketing, MURO Charity are exempted from having a large amount of MURO in their account and not violating the principle of equality due to these amounts, and 1% payment of these wallets within the framework of their designated usage areas will be contrary to the principles of the MURO Project.

Exchange master wallets may also be exempt from this calculation, depending on whether centralized exchanges reflect the 1% Holders Bonus deducted from transfers into the balances of their users. The problem seen here by the MURO team is that central exchanges take their account balances from the user's wallet and collect them in a single cold wallet, and therefore they are the largest Holders except for the wallets mentioned above, for which they will receive the largest share of the 1% Holders Bonus.

3. Technical Information

3.3. Excluded Wallets

Pool Mining platforms for MURO will have the status of collecting balances in a single wallet and gaining privileges from the 1% Holders Bonus, as in central exchanges, their wallets can be removed from the accounts according to the conditions of the companies that will provide mining services.

The MURO Project has a duty to protect the interests of the individual investor and will not put any company or institution at the forefront within this framework. Any platform that individual users can benefit from will be included in this calculation and will benefit from the required bonuses.

The MURO Developer Team keeps the right of wallets to be included or not included in the Auto Eco System completely confidential.

WE HAVE A PROBLEM
AND
SOLUTIONS

4. We think of Problems and Solutions

4.1. Coin Inflation

As MURO Team, the biggest problems we saw in the cryptocurrency sector were the inflation of cryptocurrencies in the market. Withdrawn from the market in exchange for coins released from production or central companies the lack of value created problems in maintaining the balance of supply and demand.

Considering that the vast majority of MURO's total amount will be released after the specified 6-month lockout, it is aimed to create this supply–demand balance by withdrawing 1% of the circulation (BURN) for each transfer made thanks to the ecosystem that is added to MURO's codes and operates completely decentralized.

4. We think of Problems and Solutions

4.2. Retention Bonus

Another problem we identified was that people who invested, believed and trusted a cryptocurrency could only benefit from price increases.

Therefore, the decentralized ecosystem added to MURO codes is planned to be distributed free of charge and fairly to people who rely on MURO and only keep it in their wallet, with another 1% cut per transfer.

For example, a MURO investor with 1000 MURO in their wallet today will be able to own 1005 MURO tomorrow and 1040 MURO tomorrow by simply keeping MURO in their wallet without doing anything. (The figures are given as examples, they are non-binding.) This will allow to profit not only from price growth, but also from coin inflation.

4. We think of Problems and Solutions

4.3. MURO Relief Fund

In undeveloped or developing countries, war zones and even in many parts of the world, we are witnessing children paying a very heavy price due to financial impossibility.

As the MURO Charity fund, it is aimed to help children in need with a budget of 1% cut from transfers added to the Ecosystem in order to solve this great problem that we see in the real world, if not completely.

Investors who buy, hold, trade and profit from MURO will have gained a place in solving this problem even without realizing it.

Let's not forget that today's children are tomorrow's rulers.

PRE – SALE

5. PRE-SALE

The MURO Pre-launch will only be held through www.murotoken.com, MURO's official website. The total number of coins to be sold in the pre-sale is 600,000,000 (six hundred million).

MURO Pre-production will take place in the specified phases and quantities, and there will be no additions or subtractions in these phases and quantities. (Table 1).

5. Pre-sale

5.1. Pre-sale Terms

The pre-sale will be finished early if all phases are sold, otherwise it will continue for 60 days. At the end of 60 days, users will be able to choose which of the wallet withdrawal options they want within 7 days.

Coins will be sent to the wallets indicated by users who want to withdraw coins, and Ecosystem Outages will be disabled in these submissions.

5. Pre-sale

5.1 Pre-sale Conditions

Step	Price	USD	Number of Coins	Total Bonus Amount	Bonus Ratio
Step 1	0.001	300.000	300.000.000	100.000.000	0.15%
Step 2	0.005	1.000.000	200.000.000	100.000.000	0.10%
Step 3	0.010	1.000.000	100.000.000	100.000.000	0.05%

The sending of coins to accounts or mines will be simultaneous, and no priority or privilege will be granted to anyone.

Pre-election will only be done using USDT (BNB). Only transactions made from the BNB network will be reflected in the purchase menu. Users are responsible for choosing the right network for their actions.

The pre-treatment process will generally consist of 3 stages.

Start of Pre-Start
Decision Process (Pool or Shooting)
Distribution - Initiation of Coins

5. Pre-sale

5.2. Pre-sale Process

In the first process, users who register on the MURO Pre-Sat page will make their purchases through phase, which is active as soon as the Preflight starts. As the quantities specified in the phases are sold, the next phase will automatically be active.

After the pre-sale end requirements are fulfilled (45 days or all phases have been sold), our users will be asked what they want to do with their coins, each user will determine their choice from the system and enter the necessary information into the system.

In the next step, the liquidity calculated according to the number of coins that will enter the market will be added to PancakeSwap. (You can check the Listing and Exchanges section for details.)

5. Pre-sale

5.2. Presale Process

After the addition of liquidity, coins will be sent to the specified addresses and pools, pools will be actively started from this moment.

Coins earned as bonuses on the pre-launch page can be withdrawn into wallets, but after Phase 3, the Bonuses specified in the Table will only be applied to the amount of coins to be sent to the pool and will be distributed.

Users do not have to take all the coins they receive or send them all to the pool, they will be able to withdraw the amount they want and send the amount they want to the pools.

Coins that cannot be sold in phases or separated and distributed as Bonuses in Token Economy will be sent to Marketing and Airdrop wallets and will be used in the Advertising and Listing stages in the future. You can check the Token Economy page to examine the uses of wallets.

LISTING AND EXCHANGES DURATION

6. Listing and Exchanges Process

Just before the end of the pre-sale and the distribution of coins, listing will be carried out on two conditions:

1 MURO = 0 when all phases are sold. 0.01 USDT,

When not all phases are sold, the listing price is added 500% above the price of the last sold phase (Example: \$0.005 if the final sale is made in Phase 3)

1 MURO = 0.010 USDT will be listed in Pancakeswap.

The amount of liquidity to be added will be proportional to the number of coins withdrawn to wallets after pre-sales.

As an example, all coins sold are drawn to wallets, if none are sent to the pools, 80% of the amount collected in the pre-sale, 50% is sent to the pools, and if the other 50% is drawn into the wallets, 40% of the collected amount will be added as liquidity. The purpose of this is to keep a liquidity ready in the background in coins that go to the pool and do not enter the market.

6. Listing and Exchanges Process

The liquidity to be added to Pancakeswap will be locked at 100%, which will be blocked from interfering with the developer team. The part that is not added to the liquidity will be protected by the MURO team during the sales period and will be added back to liquidity at the end of the sales period. Use other than liquidity is not foreseen for this fund.

Although the MURO team has started negotiations with centralized global crypto exchanges as of now, the first decentralized exchange listing will be carried out at the end of the second semester (no later than 45 days after the Koin distribution). This date may be brought forward or postponed forward upon the necessity of the MURO team in accordance with the needs and demands of MURO supporters.

About listing, the MURO Team will take the ideas of MURO Investors through Social Media and add them to the evaluation.

TOKEN ECONOMY

MURO's Token Economy is indicated in the table and chart below. 12 for the details of token economy and the projected uses. You can check out Economy Wallets and Descriptions.

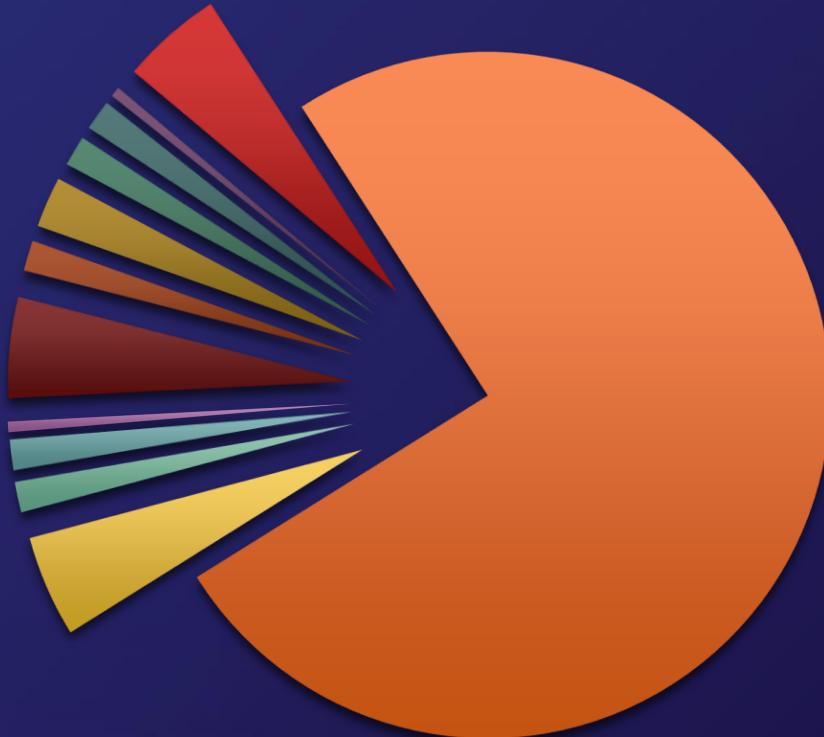

7. Token Economy

Purpose of Usage	Share in Total	Number of Coins
Pre – Sale	4.7619 %	1.000.000.000
Lock	75.2376 %	15.800.000.000
Liquidit Coin	4.7619 %	1.000.000.000
Developer Account	1.4286 %	300.000.000
Marketing	1.4286 %	300.000.000
Airdrop	0.4762 %	100.000.000
MURO Charity	4.7619 %	1.000.000.000
Bonus	1.4286 %	300.000.000
Arge	2.3810 %	500.000.000
Others	1.4286 %	300.000.000
Pre ICO Sale	1.4286 %	300.000.000
Burn	0.4762 %	100.000.000
Total	100.00%	21.000,000.000

ECONOMY WALLETS AND EXPLANATIONS

8. Economy Wallets and Descriptions

Wallets in Token Economy and all usage areas are stipulated by the MURO team as follows. These wallets will be added to Whitepaper prior to Token Listing with their address and will be considered in a way that everyone can follow.

The MURO Team may make sales from the specified wallets in order not to cause a possible Pump–Dump incident and to ensure that MURO proceeds gradually but firmly and confidently in its chemistry, but the proceeds from these sales will be used for the purposes specified in the cut.

All wallets mentioned here are removed from the Auto Ecosystem from day one, preventing them from receiving a large share of Holders bonuses. Accordingly, the automatic eco–system will not be applied for transfers from these wallets.

8. Economy Wallets and Descriptions

8.1. Pre-sale Wallet

Wallet Address:

0xe5bcC5745f10Fb0c15D4C715638eed14c3515F5A

1,000,000,000,000 MURO Pre-sale is available to users in the pre-sale wallet. At the end of the pre-auction, the remaining MURO Tokens in this wallet will be transferred to the Airdrop wallet.

8. Economy Wallets and Descriptions

8.2. Bonus

Wallet Address:

0x1230834daf18fe61B60CC288e455E5A0BBacfa82

The bonus wallet has a total of m a x given during pre-flight. There are 300,000,000 MURO to be used to cover 15% Bonuses. The portion of this wallet that does not need to be distributed as a bonus according to the pre-availability will be transferred to the Marketing wallet.

8. Economy Wallets and Descriptions

8.3. Airdrop

Wallet Address:
0x717B581f015175Cad63fea0549d58Cefc070135c

This wallet has 100,000,000 MURO allocated to contribute to muro's awareness, strengthen social media accounts, and distribute with different tasks. During the use of this budget, not only new users, but also those who already have MURO will not be ignored.

8. Economy Wallets and Descriptions

8.4. Developer Team

Wallet Address:
0xAABff0B4e30dba05b5cb43D33191d25fC04F0006

This wallet has 300,000,000 MURO owned by the Developer Team. The MURO team has no personal share or right to any other wallet other than this wallet. The coins in this wallet can be moved unanimously by the entire team. It's a sale.

will be the last transaction for the wallet. If stipulated by the MURO team, a quantity of this wallet will be staked.

Apart from 300,000,000 MURO from this wallet for the Developer Team, the Developer Team will not be a personal source of financial gain.

8. Economy Wallets and Descriptions

8.5. ARGE Wallet

Wallet Address:
0xeBdA74f3741323ACDb34396f4A2F0db40f204141

In order to budget for Research and Development operations in this wallet.

There are 500,000,000 MURO. Development of the projects specified in the Roadmap, creating financial resources for these projects, financing of software teams, the funds required in the technical collaborations are in the definition of duty and use of this wallet.

8. Economy Wallets and Descriptions

8.6. Marketing Wallet

Wallet Address 0x5870013DD4B9dfcac45bF00ea9D4CBA4558961e1

The number of coins in this wallet is 300,000,000 pieces. The job description of this wallet is to finance situations such as all advertising activities, sponsored promotional articles, all live events to be organized, banner ads to be given to professional crypto-linked sites such as BSC, Coingecko. In addition, the financial strength of sponsorship agreements and Stock Listings to be made as MURO will be covered from this wallet.

8. Economy Wallets and Descriptions

8.7. MURO CHARITY

Wallet Address:
0x800E64014d713a8dce6D72652ed492Ac76ae5938

The MURO Charity project is the most valued project of the MURO team. Although it comes to mind that MURO Charity was originally created to support the MURO Project in general, the MURO Charity project is the main project that sits at the very center of MURO. For detailed introduction of this project, please refer to the title 12. MURO Charity.

1,000,000,000 MURO has been allocated for the funding of the MURO Charity project, which has been made sustainable by 1% taxation added to the auto ecosystem.

8. Economy Wallets and Descriptions

8.8. Pre ICO Sale Wallet

Wallet Address:

0xc6D6b774d3C2975550694fdd3545002C6aef2F7A

There are 300,000,000 MURO in this wallet that are scheduled to be sold to wallets after pre-sale within a specified period of time on pages such as CoinTool - DxSale. If the sale herein does not reach the Minimum Amount, it will be repeated on a similar page, and increased or unsold coins will be sent to The Burn.

8. Economy Wallets and Descriptions

8.9. Other Transactions Wallet

Wallet Address:
0xE90bE6D10c55414dA2F8223aFf9E16c8Cc55a765

The Other Transactions wallet, created to cover any expenses or promotions not described above, contains 300,000,000 MURO. This wallet will support R&D & marketing & airdrop wallets as needed.

8. Economy Wallets and Descriptions

8.10. Liquidity Coins Wallet

Wallet Address:
0xff0921b49713AF0312EEa43a50e632e09310941E

1,000,000,000 MURO (Pre-sale amount) is kept in order to make one-to-one listings by calculating that all MURO Tokens sold after pre-sale will go on sale.

The liquidity required after the pre-sales will be provided from this wallet, and MURO's that do not need to be used for this purpose will be burned completely.

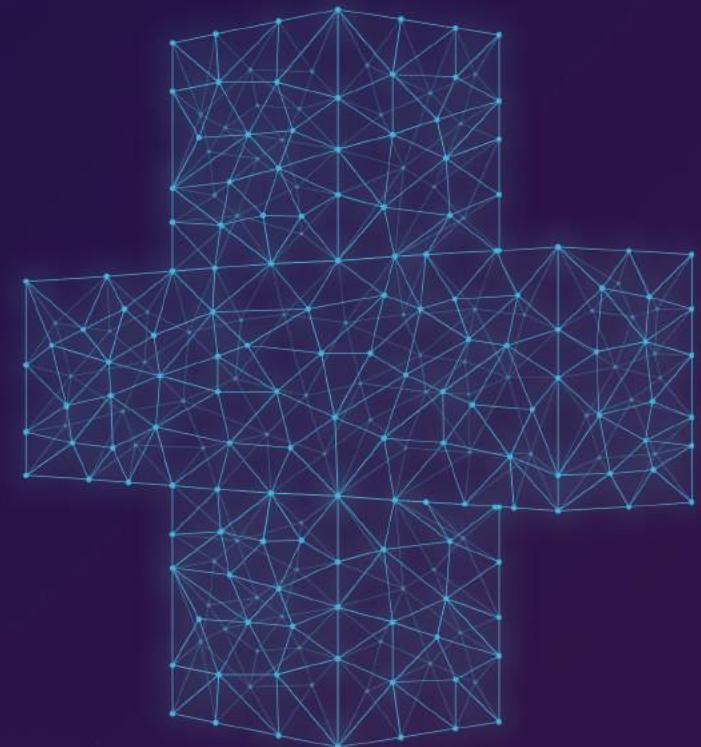

8. Economy Wallets and Descriptions

8.11. Locked Wallet

Locked wallet 15,800,000,000 MURO locked for 6 months
that is, it has 75.2376% of the total NUMBER of MURO. No one has access
to this wallet, including the Developer Team. MURO's will be sold gradually
on exchange exchanges such as MURO EX , Binance, and so on.

MURO CHARITY

9. MURO CHARITY

9.1. MURO Charity Organization and Purpose

The MUROTOKEN project does not see crypto assets as just a value or exchange tool. It also believes in the transformative power of these digital assets.

One of the objectives of creating our project is to reduce the increasing social inequalities with the information age and to reach the masses who need social assistance indiscriminately (religion, language, race, gender, etc.).

Based on this philosophy, MURO Charity was established. MURO Charity will be formalized with Foundations to be established in various countries around the world and all accounts will be audited by the official institutions of the countries in which it is located.

9. MURO CHARITY

9.1. MURO Charity Organization and Purpose

The funds to be generated due to murotoken's natural structure will be used for animal rights worldwide, especially for children in need of financial social and social assistance in underdeveloped African countries.

For the benefit of all mankind, for our tomorrows

We need to make these children healthy and able-thinking individuals in all areas. Therefore, working as a stakeholder with non-governmental organizations that work transparently and accountable with sustainable assistance and development goals is among our priorities.

The work of major companies such as UNICEF, WWF and GREENPEACE, which mainly work in the field of Child Welfare, is followed by the MURO Charity team. As MURO Charity, our mission is to contribute and support the work of similar organizations.

In this context, our main mission is to reach out to children in need in the most diverse and remote parts of the world and touch their lives with funds consisting of burned tokens and anonymously growing audiences due to the high usage area due to the natural nature of MURO.

9. MURO CHARITY

9.2. MURO Charity Fund

Muro Charity needs regular funding support to provide assistance for the purpose of establishment. Muro Charity has overcome the fund-raising problem, which is the main problem of many charities, thanks to the MUROTOKEN project. Of course, we accept funding from other companies and individuals, such as other charities, if they comply with our requirements.

However, our main funding comes from the 1% from MURO Token transfers. At the same time, we are happy and proud to offer muro token users the feeling and pride of being involved in the charity projects that many people want to do as the MURO Charity platform.

MURO FINANCE

MURO Finans is actually within the structure that includes several platforms of the MUROTOKEN project. As the name suggests, all financially based operations of the MURO project will be published and managed through this platform. Yield Farming, Farming, Soft Stake and many other services will be available to you on the platform in the future, where users can do these operations below the minimum.

10. MURO Finance

The MURO Finance Platform will be launched with a great MURO mining plan that will allow users to earn Passive Income with non-profit, reference and production bonuses, but never distribute more than it produces.

After the follow-up of our Research and Development team and the follow-up of other cryptocurrencies that we think have a bright future, they will be produced at the amounts and rates determined by the MURO team through MURO Farm, so that other coins can be obtained only by having MURO.

A special group, also established within the Research and Development team, will be announced through this platform in the ICO, IDO and Pre-Sale process, whose reliability has been checked and whose projects are promising, and steps will be taken by us to grant privileges to MURO Finance users.

MURO WALLET

MURO Wallet is a simple but effective decentralized cryptocurrency wallet that helps you store your cryptocurrencies. Thanks to the Private Keys to be created in this wallet, the wallet will be completely under your control. It offers fairly simple and user-friendly features that anyone can use. MURO Wallet is a wallet that's easy to set up and use, ready to use in seconds.

11. MURO Wallet

Since this wallet allows storage not only for MURO Token, but also other cryptocurrencies, you can buy and send multiple cryptocurrencies with MURO Wallet, not just one or two. The particular thing that users here should pay attention to is to store and not lose private keys, as with other wallets. You can use MURO Swap and other decentralized exchanges (DEX) directly through MURO Wallet.

MURO Wallet's contribution to the ecosystem will be to increase muro's awareness in the first step. Approximately, people who use MURO Wallet will be able to take priority advantage of airdrops and promotions will be made to encourage them to use MURO Wallet.

MURO FUN

As it is known, the Gaming sector is an industry in which very large capitals are returned in the world and almost every smartphone user is consciously or unconsciously involved. The MURO Fun project is the general name of the muro team's improvements in gaming and entertainment.

12. MURO Fun

Although the MURO Fun Team started with small free games that can be played online and offline in the first place, muro tokens will be included in these projects using systems such as Coinpayments in the future.

Muro Fun product range is a very widely planned platform. Although these planned ones currently only start with fun little games, they can extend to the Online Quiz if the legal processes for which very high rewards will be awarded have concluded and the necessary permissions are obtained. Although the necessary legal processes and procedures for these transactions will be put into effect after the pre-initiation, the necessary negotiations with the cooperation and software support companies have already started..

There is no limit to the MURO Fun platform, it will be continuously improved, updated, and presented to you valuable users by always prioritizing earnings and entertainment.

12. MURO Fun

It is the common view of the entire team that the MURO Fun system will contribute much more to the MURO ecosystem than anticipated. In order to make this contribution, MURO payments will be made much more advantageous than other crypto or FIAT currencies in all in-system payments and in this way, interest and demand for MURO will be increased. As an example, all payments made as MURO will be offered a discount of 10%, thanks to the developed in-system SWAP converting investment vehicles to MURO will be made doable in just a few clicks.

MURO - AI TRADING

MURO Token in the MURO project is a platform supported by a dedicated team within the developer team. This platform was originally established to provide convenience to users who are not cryptocurrency traders.

As we mentioned at the beginning, we aim to provide a service where short, medium and long term signals or even margin signals from the system prepared by a special team are presented to users.

The first design is to enable them to participate in professional trades within a few seconds without transferring funds from accounts with api link. In the following processes, a stronger structure will be created by supporting with muro-ai mobile version and MURO-AI Bot (Algorithm Trade) service.

13. MURO AI Trading

13. MURO - AI Trading

For example, MURO users who qualify to use the MURO AI Trading Platform or make the necessary payments will only be able to link the AMOUNTS and BNB held in their accounts, such as Binance/etc., to the MURO AI Trading Platform by granting trade permission only to the API they will create.

Then the signals examined by expert Traders on the platform will fall into the system, users will be able to review these signals with push notifications they will receive via E-Mail and Social Media, start Trade directly from muro platform, and play on the entry and exit points as they wish.

The operating logic will be that users who hold certain amounts of MURO Tokens can benefit from this service for free but for a certain amount of MURO Tokens in others.

Again, these users will be given information about the ICO and projects that will come to the cryptocurrency market through this platform.

MURO SWAP

Swap in cryptology is to instantly trade any asset supported by the trading platform with any other supported digital asset.

For example, you can trade BNB with MURO or MURO with BUSD according to your preference.

Muro SWAP platform is a clearing platform developed by the MUROTOKEN team and focused on winning by MURO investors. Muro will be the main coin of this platform, which is an automated market maker (AMM) that allows dual token exchanges on a Mainnet.

In order for this platform to be a system where software operations have started and no errors are allowed, the software team's most workload-generating technique.

This part will be the improvement. The network on which network this platform will be performed will be announced after the final tests.

14. MURO - Swap

In the coins to be published on the MURO SWAP Platform and by participating in the liquidity pools of these coins, an extra source of sweaters will be provided to the users, while the trading of coins will be allowed with very simplified steps.

MURO Swap will allow all users, such as their peers, to create Farming Platforms and will increase the number of MURO users by accepting MURO Token as a payment unit in the installation of such platforms, giving MURO Token a new use.

In the future, it will be possible to use multiple Blockzincir networks on MURO Swap if the Blockzincir inter-tunnel installation system, which has not yet been tested, is available. The aforementioned Tunnel System is not developed by the MURO team, but by experts in the subject.

MURO Exchange (MURO.EX)

15. MURO Exchange (MURO.Ex)

The MURO Exchange platform will be a Stock Exchange platform that will be built on the main operating system of known centralized cryptocurrency exchanges.

MURO Exchange will be incorporated through Malta, where Binance, the world's leading cryptocurrency exchange, also carries its headquarters, and the necessary legal permissions will be obtained through this company. On MURO Ex, not only conventional trading, but also Leveraged Margin Transactions, Stake Pools, Future Crypto Trading accounts will be offered to users.

As well as benefiting those who pay the transaction fees on the exchange with MURO, users who keep a certain amount of MURO locked will be offered services such as 0% transaction fee, extra weekly MURO earnings and physical Credit Cards defined directly to the MURO Ex account with virtual crypto credit card and subsequent collaborations...

15. MURO Exchange (MURO.EX)

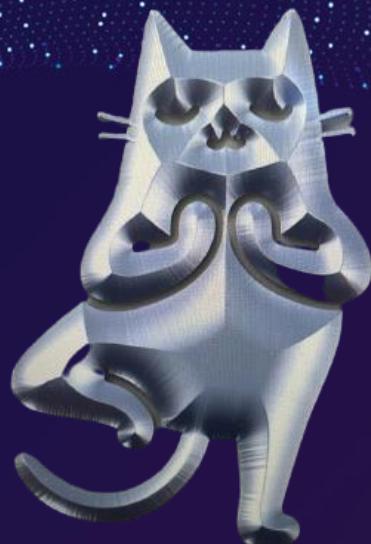

In its new coin listings, the MURO Ex Platform will ask developer teams to buy and lock up MURO instead of demanding a very large amount of FIAT or other cryptocurrency. All listing fees will be charged via MURO Token, giving MURO Token another use case.

Another answer to the "Why should I buy MURO?" question for MURO Token will be added.

Concluding Remarks

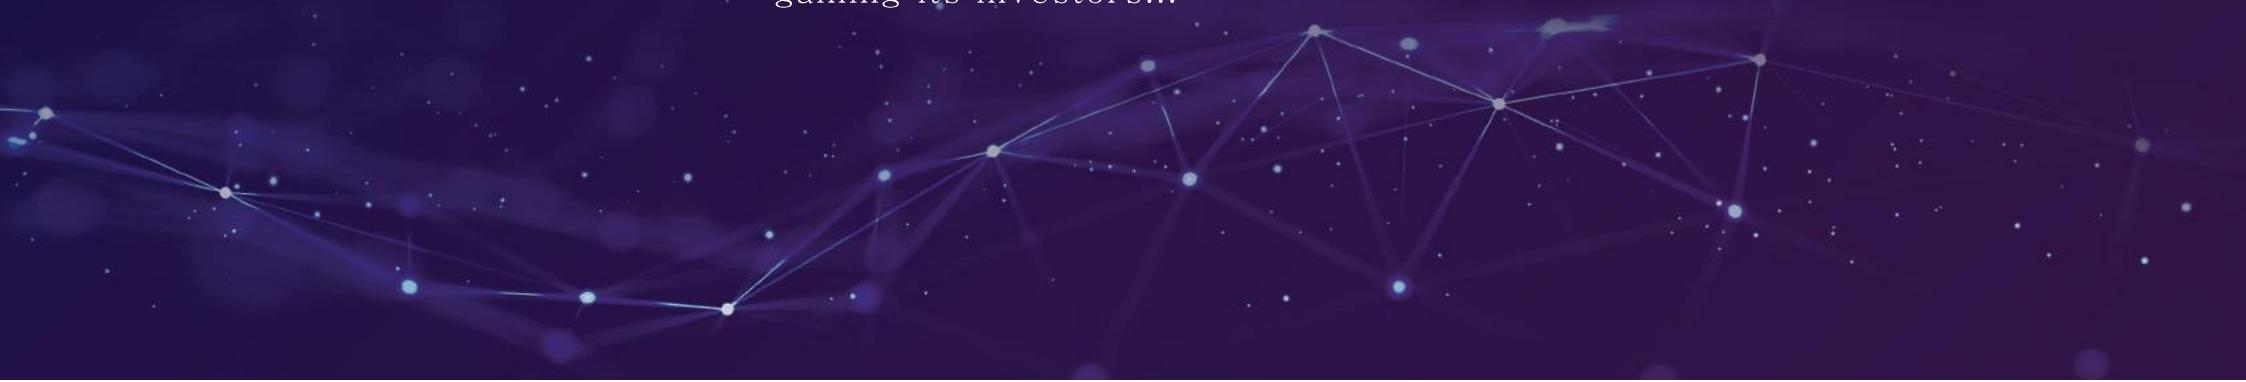

The projects mentioned in this Whitepaper are not the entire MUROTOKEN project.

There are dozens of other projects that the R&D team is working on technically feasibility, which will be prepared and integrated into the MUROTOKEN project in the future, and the value and usage area that will join the MURO Token in these development and integrations will always be kept first.

Whitepaper murotoken project is organized to help its users think about the ways to follow.

The MUROTOKEN project is much more than a cryptocurrency or specified platforms. The concept of social people will be named MUROTOKEN in digital environment and will not stop fulfilling its social obligation all over the world as it moves towards continuously gaining its investors...

Concluding Remarks

Finally, MURO TOKEN is not just a token, it is part of a project consisting of a four-way Platform. One of them is Yabbaa as a Charity (MURO CHARITY).

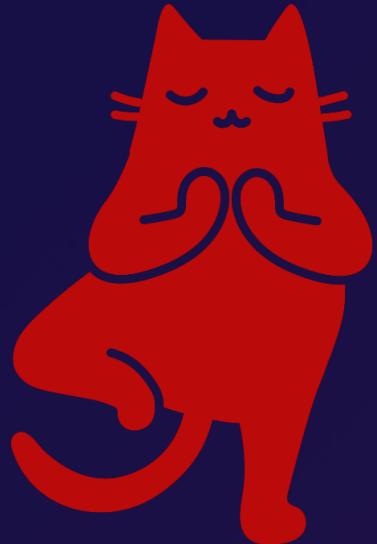

Again, a social media that is our own application and we have prepared its infrastructure Yabbook, which has an app, is an instant voice and video calling chat app and is actively in use.

In this application, you canThe addition of Muro wallet and a fun game will make it more enjoyable with integration.

Muro COIN, which we will use as a stable coin in the future, will be stronger and more valuable with its own blockchain network.
